

Welcome to the Serial Number Tracking (SNT) Carcass Charge Reversal

Tutorial

Go to Next Slide

Before You Start Training

This tutorial covers the queries for users to find missing DLRs that are causing a Carcass Charge.

After logging into the SNT web site at www.snt.navsup.navy.mil:

- Most retrograde items can be found by using the Retrograde query.**
- Other options to finding a missing carcass are:**
 - * Email notification via Carcass Tracking**
 - * Seeing if a Carcass is being repaired at a commercial vendor**
 - * Checking Installed Aviation**

**Document Number
V218533025G621 result
screen. This information can
be printed and used to
request carcass charge**

If you do not find your Document Number, note that sometimes in the retrograde process, documents numbers are either lost or parts of the documents number are transposed for various reasons.

- * Review the results in the NIIN and S/N combination that match the NIIN and S/N on the turn in document. If there is a match, and the date received at the ATAC or DOP/DSP is after the Julian date of the turn-in document, use that information to request a carcass charge reversal.

- * If If the NIIN and S/N combination are not available look for a document number with transposed numbers that is close to the turn-in document number.

Retrograde Carcass Tracking

Carcass Tracking allows the user to set up a carcass watch by Document Number, UIC, NIIN or UIC and NIIN combination. With this watch the user will be provided email notification of any movement of material being “watched.”

Below is an example of how to set up the Document Number carcass watch.

Serial Number Tracking System (SNTS) \ Decision Support Module (DSM) \ Retrograde \ Carcass Tra - Microsoft Internet Explorer p

It is possible that the searches above will not result in finding your missing carcass.

Some DLRs are repaired at Commercial Activities. SNT queries the Commercial Asset Visibility (CAV) database that records receipt and other information for these items.

To do this search, Click on Queries, then Asset Visibility and then Depot Maintenance Commercial. You can search by NIIN, NIIN and S/N or UIC. The screen below will appear

The screenshot shows a web browser window displaying the SNT Asset Visibility Depot Maintenance Commercial Query page. The page has a header with the SNT logo and navigation links. The main content area is divided into two sections: Search Criteria and Asset Visibility. The Search Criteria section contains input fields for Serial Number, NIIN, and UIC / DODAAC, along with Search and Reset buttons. The Asset Visibility section contains a description of the query and search criteria. A blue arrow points to the NIIN input field, and a red arrow points to the Search button. A blue box with yellow text is in the bottom right corner.

Asset Visibility
Depot Maintenance Commercial Query

Description:
Maintenance which is the responsibility of, and is performed by, designated Commercial maintenance activities for direct support of fleet commands. Maintenance phases normally consist of calibration, repair, overhaul or replacement of damaged or unserviceable parts, components, or assemblies; the emergency manufacture of nonavailable parts; and the provision of technical assistance to fleet commands.

Search Criteria*:

- **Serial Number** - cannot be queried by itself, wildcard (%) searches permitted
- **National Item Identification Number (NIIN)** - can be queried by itself, wildcard (%) searches are not permitted
- **Unit Identification Code (UIC) / Department of Defense Activity Address Code (DODAAC)** - can be queried by itself, wildcard (%) searches are not permitted

Result Set*:

- Condition Code
- Description
